

Dear sir/madam,I am writting to you to please consider the rights of XM
sattelite radio listeners and do not favor the commerical radio interests. I am
paying 10 dollars a month to escape the monopoly of local radio which has become
unlistenable in the past few years, I am visiting therpist and therefore use my
car constantly. I listen to XM as it is by and large commercial free and the
new service of local weather and car reports is an invaulable service as I no
longer need to disconnect the XM to find out traffice conditions. XM has
returned my trust to listening to the radio when in the past I would simply
listen to CDs, please do not listen to the lobbyists from Clearchannel or
whatever that organisation is called and listen to simple guy who wants to get
his comercial free, unusual music and weather, news and traffic in one place...
just like the sattelite tv gives at the moment!

Regards

Ken cronin
